## About AIKTC

The **Anjuman-I-Islam**, Mumbai was founded in 1874 by a small group of devout and progressive Muslims lead by none other than **Dr. Badruddin Tyabji**, Third President of Indian National Congress and the First Indian Chief Justice of Bombay High Court, with a 'desire to see the Muslim Community advance in education and social standing. It has 95 institutions and more than one lakh ten thousand students.

**Anjuman-I-Islam's Kalsekar Technical Campus (AIKTC)**, located in New Panvel, is recognized by the Directorate of Technical Education (DTE), Maharashtra, Approved by All India Council of Technical Education (AICTE), New Delhi and is affiliated to the University of Mumbai. AIKTC has state-of-the-art infrastructure and instructional facilities for undergraduate and post graduate students in various functional areas of specialization, viz., School of Engineering & Technology (Civil, Computer, Electrical, Electronics & Telecommunication and Mechanical), School of Pharmacy and School of Architecture. The total intake for UG, Direct II second year & post graduate is **700**. Currently the total strength of students on campus is **2267**.

## About KRRC

The Central Library was established in 2011. Right from its inception, it has become the "*heart of the campus*". The library aims to fulfill all kinds of educational, informational and recreational needs of the students, teachers, researchers and other users by providing them with variety of services and wide range of Books, Journals, Reference Books, Audio-Visual aids and e-Resources.

## About Workshop

Cell phones are becoming an important aspect of our lives. The comfort and convenience they provide certainly made our lives much easier than ever before. Two brilliant features found in modern cell phones are: the integration of digital cameras and the ability to access the Internet any-time and anywhere, thus, enabling us to seek information when we need it. Nowadays, the built-in digital camera found in cell phones and Internet access can be consolidated to provide a new dimension of information seeking. A user having a camera phone equipped with the correct reader software can scan a two-dimensional (2D) barcode and decode it to launch and redirect a phone's browser to an embedded URL or to resolve text embedded in the scanned barcode. The benefit of such a feature in modern mobile phones can be further extended to provide effective and potential library services to a new generation students.

## Resource Persons

Mr. Pralhad Jadhav, KM (Khaitan & Co.) and Mrs. Shaheen Momin, Librarian (AIKTC).

## Target Audience

The workshop will be highly beneficial to LIS professionals and teachers and to those involved in developing and maintaining digital collections.
