Sem VI

QP Code: BM-10109 8-5-14

(2 Hours)

[ Total Marks : 60

|    |            | (2 Hours) [ Fotal Marks: 00  |        |
|----|------------|--|--------|
| N. |            | (1) Question No.1 is compulsory<br>(2) Attempt in all five questions.<br>(3) Figures to the right indicate full marks.                                     |        |
| 1. |            | ite short notes on (any two):-  (a) National Budget  (b) Motivation  (c) SWOT Analysis  (d) Direct and Indirect Taxes  (e) FDA regulations and approavals. | 12     |
| 2. | (a)<br>(b) | What is financial management and explain sources of funds. Distinguish between Sales and Marketing.  | 4<br>3 |
| 3. | (a)        | How patents are Infuencing in growth pharmaceutical industry? Give advantages and disadvantages.   | 4      |
|    | (b)        | Explain various pricing policy.  | 3      |
| 4. |            | Explain the concept of 7's.  Evaluate the role of a 'Supervisor'.  | 4<br>3 |
| 5. | (a)        | Explain marketing mix. How packaging is considered as fifth 'P' of marketing explain.  | 4      |
|    | (b)        | Steps in sales forecasting.  | 3      |
| 6. | (a)<br>(b) | Discuss the main component of a balance sheet.  Difference between Branded and Generic market.   | 4<br>3 |
| 7. | (1         | e in brief about (any two):—  a) New product development  b) Nature of regulated and unregulated market  c) Inventory management.                          | 7      |

Pharmonalogy- 711

N.B.: (1) Question No. 1 is compulsory.

QP Code: BM-10106

1 Total Marks: 40

(2 Hours)

|    | (2)        | Attempt any three questions from the remaining four questions.                  |    |
|----|------------|---|----|
|    | (3)        | Figures to the right indicate full marks.                                       |    |
|    |            |   |    |
| 1. | Answer     | any five questions. All questions carry equal marks :-                          | 10 |
|    | (a)        | Classify anticholinesterases with examples.                                     |    |
|    | (b)        | Nonselective $\beta$ -blockers should be avoided in diabetic patients. Justify. |    |
|    | (c)        | Explain how ephedrine can relieve nasal congestion.                             |    |
|    | (d)        | Explain pharmacological action of atropine on eye.                              |    |
|    | (e)        | Write MOA of Acetazolamide.   |    |
|    | (f)        | Write therapeutic uses of succinylcholine.                                      |    |
|    | (g)        | Can anticholinergic drugs be used in glaucoma patients? Justify.                |    |
|    |            |   |    |
| 2. | Explain:   | in detail pharmacotherapy of Angina Pectoris.                                   | 10 |
|    |            |   |    |
| 3. | (a) Disc   | cuss the MOA, adverse effect and therapeutic uses of HMG Co-A reductase         | 5  |
|    | inhi       | bitors.   |    |
|    | (b) Exp.   | lain the role of Digitalis glycosides in treatment of cardiac failure.          | 5  |
|    |            |   |    |
| 4. | Classify a | antiarrhythmic agents. Discuss class IV antiarrhythmic agents in detail.        | 10 |
|    |            |   |    |
| 5. | Write sho  | ort note on (any two):—   | 10 |
|    | (a)        | Role of diuretics in management of hypertension.                                | _  |
|    | (b)        | Sympatholytic drugs   |    |

(c) Peripherally acting skeletal muscle relaxants.

Phanon. Analysis.

Sem VI

N.B.: (1) Question No.1 is compulsory.

2013 - 14 QP Code: **BM-10095** 

10-5-14

(2 Hours)

[Total Marks: 40

|    | (2) Attempt any four questions out of remaining six questions.   |           |
|----|--|-----------|
|    | (3) Draw neat diagrams wherever necessary.   |           |
|    | (4) Figures to the right indicate full marks.  |           |
| 1. | 1. (a) Explain the following terms (any five):—  (i) Transmittance  (ii) Overtone  (iii) Supporting Electrolyte  (iv) Combination Band  (v) Auxochrome  (vi) Red shift  (vii) Triplet state.   | 5         |
|    | (b) Convert absorbance reading of uv-visible spectrophotometer 0.523 to perotransmittance and convert 75% transmittace to absorbance.  | cent 3    |
| 2. | <ul><li>(a) Draw a block diagram of a fluorimeter. Explain in details role of filters in it.</li><li>(b) Discuss amperometric titrations.</li></ul>  | 4         |
| 3. | <ul> <li>(a) Discuss sample preparations for solids in IR spectroscopy.</li> <li>(b) Enlist the various light sources used in UV and fluorescence spectroscopic analy Explain in detail any one detector used in Uv-Vis spectroscopy.</li> </ul> | 4 /sis. 4 |
| 4. | 4. (a) Draw a neat labelled diagram of dropping mercury electrode and explain the construct and working.   | tion 4    |
|    | (b) Discuss the various electronic transitions that occur during Uv-visible spectrosco   | ру. 4     |
| 5. | Explain how solvents influences the shift in absorption maxima in uv-visi spectroscopy.  | 4 lble    |
|    | (b) Draw a polarographic curve and explain various terms involved in it.   | 4         |
| 6. | . (a) Explain Primary and Secondary coulometric titrations with the help of suita example.   | ble 4     |
|    | (b) State Beer-Lambert's Law and give its deviation.   | 4         |
| 7. | Write short note on (any two):—  | 8         |

(b) Difference spectroscopy

(c) FTIR

(a) Ilkovic Equation

2013-14

QP Code: BM-10104

| (2 Hours) [Total Marks  | : 40 |
|---|------|
| <ul> <li>N.B.: (1) Question No. 1 is compulsory.</li> <li>(2) Answer any four questions from remaining questions.</li> <li>(3) Draw structures wherever applicable.</li> </ul>  |      |
| <ol> <li>State True or False and Justify your answer.         <ul> <li>(a) Peanut Oil is adulterated with cotton seed oil.</li> <li>(b) Dextran is a natural gum.</li> <li>(c) Galls gives match stick test positive.</li> <li>(d) Ash Valve indicates the glycosidal content in the drug.</li> <li>(e) Tragacanth gum is usually found in cork cells.</li> </ul> </li> </ol> | 8    |
| <ul><li>(f) Mucilage is present only in the seeds.</li><li>(g) Mango Kernel oil is used as a substitute for Cocoa butter.</li><li>(h) Chitin is a polysaccharide of plant origin.</li></ul>   |      |
| <ul><li>2. (a) Explain the significance of Microbial bioburden in Quality Control of Drugs of Natural Origin.</li><li>(b) Write a note on Allium Species.</li></ul>   | 4    |
| <ul><li>3. (a) Write in detail the method of preparation, chemical constituents and uses of Black Catechu.</li><li>(b) Give a detailed account of Gelatin.</li></ul>  | 4    |
| <ul><li>4. (a) Give biological source, preparation and chemical constituents of Agar.</li><li>(b) Discuss the Chemistry of Pyrethrum and Neem.</li></ul>  | 4    |
| <ul> <li>5. (a) Give the biological source, preparation chemical constituents and uses of Linseed Oil.</li> <li>(b) Write briefly about the following:— <ul> <li>(i) Thiophene from Tagetes</li> <li>(ii) Protein Hydrolysates.</li> </ul> </li> </ul>  | 4    |
|   |      |

- 6. (a) Explain the significance of Lycopodium Spore Method.

  (b) Give the biological source chemical constituents and us
  - (b) Give the biological source chemical constituents and uses of the following:
    - (i) Garcinia
    - (ii) Amla.
- 7. Write short notes on (any two):—
  - (a) Preparation and use of Maize Starch
  - (b) Waxes from Animal Origin
  - (c) Harda.

8

Con. 2734-14.

Pharm 6 Medicinal chem II

Seron VII th

QP Code: **BM-10091**22-4-14
[Total Marks: 40

(2 Hours)

N.B.: (1) Question no.1 is compulsory.

- (2) Answer any four questions from the remaining six questions.
- (3) Figures to the right indicate full marks.
- 1. Answer the following (any eight)

8

- (a) Write the structure of an amino ketone acting as a local anaesthetic.
- (b) An antiviral agent which is a purine nucleoside.
- (c) An antiulcerant agent which is an amino alkyl furan derivative.
- (d) A nitrosourea used against brain tumors.
- (e) Against which virus amantadine has antiviral activity.
- (f) Name the micro organism from which acarbose is obtained.
- (g) Draw the structure of a pyrazinoyl guanidine diuretic agent.
- (h) A primary oxidative metabolite of terfenadine.
- (i) Name the enzyme which converts prednisone to prednisolone.
- 2. (a) Outline the synthesis of any two of the following with necessary reagents and appropriate reaction conditions:—
  - (i) Cimetidine
  - (ii) Furosemide
  - (iii) Methotrexate
  - (b) Write the mechanism of action of acyclovir.

2

2

2

- 3. (a) Mention the advantages of the second generation H<sub>1</sub> antagonists over classical antihistamines. Explain with respect to loratidine and cetirizine the structural modifications that led to the preservation of antihistaminic activity while minimizing the CNS effects.
  - (b) Explain how the pH of the intra cellular and extracellular fluids influences the activity of local anaesthetics.
  - (c) List the structural requirements for optimal activity in the phenoxy acetic acid class of diuretics.
- 4. (a) What are progestins? Mention any four modifications in the structure of progesterone to decrease the androgenic effects while maintaining the progestational effects. Support your answer with relevant structures.
  - (b) Draw the structure of a metaglinide oral hypoglycemic agent. Explain their mechanism of action. How do they differ from sulfonyl ureas.

Con. 5656-14.

TURN OVER

| 5. | (a) | State whether local anaesthetics are weak acids or bases. Write their pka values.  Depict the schematic representation of the binding of an ester type local anaesthetic | 4 |
|----|-----|--|---|
|    | (b) | agent to a receptor site.  Complete the following reactions:—  | 2 |
|    |     | Cholesterol $\xrightarrow{\text{Oppenauer}}$ A $\xrightarrow{\text{H}_2\text{-Pt}}$ B  |   |
|    | (c) | In the bromination of 3-keto steroids, position entered by bromine atom depends on the configuration at C-5. Explain.  | 2 |
| 6. | (a) | Depict the activation of an alkylating agent cyclophosphamide with relevant equations.   | 4 |
|    | (b) | Discuss the site and mechanism of action of thiazide and thiazide-like diuretics.  Why are diuretics in this class referred to as natriuretic or kaliuretic agents.      | 3 |
|    | (c) | Benzimidazole proton pump inhibitors are prodrugs. Comment.  | 1 |
| 7. |     | te short notes on any <b>two</b> of the following:— Biosynthesis and termination of histamine action.  | 8 |
|    | (b) | Organoplatinum antineoplastic agents.  Non nucleoside reverse transcriptase inhibitors.  |   |
|    |     |  |   |

## Phonomalectics. I

QP Code: **BM-10097** 

28-4-14

(2 Hours)

[Total Marks: 40

| N.B |  | (1) | Question | No. | 1 | is | compulsory. |
|-----|--|-----|----------|-----|---|----|-------------|
|-----|--|-----|----------|-----|---|----|-------------|

- (2) Attempt any three questions from the remaining four questions.
- (3) Figures to the right indicate full marks.
- (4) Draw neat labelled diagrams wherever necessary.

| (4) Dia       | w heat labelled diagrams wholever necessary.                    |                 |    |
|---------------|---|-----------------|----|
| Answer any    | Tive of the following:—   |                 | 10 |
| (a) Exp       | lain importance of air capacity in tablet coating process.      |                 |    |
| (b) Giv       | e advantages of coated tablet.                                  |                 |    |
| (c) Giv       | e classification of sutures.                                    |                 |    |
| (d) Stat      | e the role of acid citrate dextrose in blood collection bottles | 5.              |    |
| (e) Wha       | at are ideal plasma susbtitutes?                                |                 |    |
| (f) Def       | ine microencapsulation. Enlist its applications in pharmacy     | ·               |    |
|               |   |                 |    |
| (a) Describe  | the steps involved in phase separation coacervation and expla   | ain temperature | 5  |
| change n      | nethod.   |                 |    |
| (h) Discuss t | he extraction of insulin from pancreas of sheep.                |                 | 5  |

- (b) Discuss the extraction of insulin from pancreas of sheep.
- (a) Discuss the different types of coating pan equipments in tablet coating process. 5
- (b) Discuss the preparation and sterilization of catgut. 5
- (a) Elaborate on sugar coating process and various film defects of the coated tablets. 5
- (b) Write a note on official dextran injections.
- Write short notes on (any two):
  - (a) Multiorifice centrifugal process of microecapsulation
  - (b) Enteric film formers
  - (c) Official thyroid preparations.

5

10

Con. 2140-14.

- I.B. (1) Questions No. 1 is compulsory.
  - (2) Attempt any three out of the remaining four questions.
  - (3) Figures to the right indicate full marks.

| Ansv | wer in brief:  | 10 |
|------|--|----|
|      | <ul> <li>(a) State factors that impart a Pearlescent texture to vanishing creams.</li> <li>(b) What are the ideal properties of face powders?</li> <li>(c) Give the mechanism of action of Deodorants.</li> <li>(d) Write a note on Depilatory formulaions.</li> <li>(e) Enlist various classes of colors used in cosmetics alongwith examples.</li> </ul> |    |
| (a)  | Discuss raw materials used in the formulation of Shampoos.   | 4  |
| (b)  | Elaborate on the evaluation of Lipsticks.  | 4  |
| (c)  | Differentiate between Vanishing Cream and Cold Cream.  | 2  |
| (a)  | Explain large scale manufacturing of Toothpastes   | 4  |
| (b)  | Write a note on Hair Colorants.  | 4  |
| (c)  | Define and classify Cosmetics.   | 2  |
| (a)  | Write notes on (any two): -  | 8  |
|      | (i) Microbial aspects of cosmetics   |    |
|      | (ii) Herbal Cosmetics  |    |
| (b)  | (iii) Sensitization reactions and sensitivity testing of cosmetics.  Give a brief account of Lather Shaving Cream.   | 2  |
| (a)  | What are the manufacturing requirements for nail lacquer as per Drug and Cosmetics Act?  | 2  |
| (b)  | Elaborate on the ill effects of sunrays and cosmetics used in protection of the same.  | 4  |
| (c)  | Enlist various eye make products and elaborate on eyeliner.  | 4  |
|      |  |    |
