		ERIODIC TEST- UT 2	-	EXM-04(a)
CLA	SS:- First Year B. Pharm		SEM:	-1	
	EME:- PCI Syllabus			1/19/0	000
SUDJEV.1 11/31-1			ATE:- 16/3/2023		
DURATION:- 60 mins MAI			MAR	RKS:- 30	
Q.01	:			Marks	CO
a)	transmit impulses from	CNS to peripheral nervous system	em.	1	
	a. Sensory neuron	b. Motor neuron			
	c. Interneuron	d. Ganglia			
b)	structural fibrous protein pre	sent in dermis layer of skin.		1	
	a. Collagen b. Melanin	c. Heparin d. T	itin		-
c)	There are pairs of spinal nerves.			1	
	a. 25 b. 28	c. 31 d. 33			-
d)	The functional unit of contractile system in	striated muscle is		1	
	a. Myofibril	b. Sarcomere			
	c. Sarcoplasm	d. Myolemma			-
e)	is the smallest bone of the body			1	
,	a. Incus b. Femur	c. Stapes d. Rad	ius		
f)	Microfilaments are composed mainly prote	ein of		1	
-/	a. Actin	b. Tubulin			
	c. Myosin	d. Chitin			
g)	Most taste buds occur in	The state of the s		1	
5)	a. the vallate papillae	b. the fungiform papillae			
	c. the filiform papillae.	d. the palate			
h)	Moving a part toward the midline			1	
11)	a. Adduction	b. Abduction			
	c Plantar Flexion	d. Flexion			
i)	In peripheral nervous system the nerves that arise from spinal cord and brain		in	1	
1)	are called as				
	a. Spinal nerves	b. Cranial nerves			
	c. Temporal nerves	d. Frontal nerves			
:)	Axial skeleton comprise of how many bon		•	1	
j)	a. 80	b. 106			
	c. 206	d. None			
0.0	2 : Long answers (Any one) (draw diagra	ms wherever necessary)			
The state of the s	braw a neat, labeled diagram of the eye as	nd explain the physiology of vision	on.	10	
a)	brau a fleat, labeled diagram of the eye as	the structure of skin		10	
b)	Draw a neat labelled diagram and explain	the structure of skin			
Q.0	3 : Short Answers (Any two) (draw diagr	ams wherever necessary)	stem	5	
a)	Write a comparative study on sympathetic	and parasympamene hervous sy	Stelli.		-
b)	With the help of diagram explain the phys	iology of muscle contraction		5	
	Draw labelled diagram and describe the st			5	

wish to emulate.

	V:00 QUESTION PAPER SESSIONAL EXAM-02	SEM:- I	
	S :- First Year B. Pharin	SEIVI. I	
	ME:- PCI Syllabus	DATE:- 16-03-2	23
	CT:- Pharmaceutical Analysis TION:- 60 mins	MARKS:- 30	
0.01:	TION:- 60 mms	Marks	CC
1)	formaldehyde is used as agent a. Masking b. Demasking c. precipitating D. None of the above	1	1
)	In calcium Gluconate assay is used as indicator a. Methyl red b. Alizarin c. Erichrome black T d. Murexide		1
All of following are reference electrodes except a. Glass electrode b. SCE c. SHE d. Ag/AgCl electrode		1	1
i)			1
e)	NaCl is assayed using 1. AgCl 2. AgNO3 3. AgBr 4. KCl	1	
f)	method is used for Chloride analysis a. Modified Volhard's b. both c. Volhard's d. No	1	
g)	Ceric Ammonium Sulphate is standardized against a. As2O3 b. NaCl c. FeSO4 d. None of the above		
h)	Iodimetry involves titration using a. directly iodine as the titrant b. starch as the titrant c. iodine liberated by reaction d. all f the above	1	
i)	Multidentate ligand EDTA stands for a. Ethylene diamine tetra-acetic acid b. Ethane diamine tetra-acetic acid d. Ethylene diacetone tetra-acetic	acid 1	
j)	Fajan's method is based onprinciple of precipitation. a. adsorption c. chelation b. Reduction d. All of the above	1	
0.02	Y	10	1
a)	Discuss Mohr's method and estimation of sodium chloride.		-
b)	Explain Cerimetry.	10	
Q.03	: Short Answers (Any two)	5	
a)	Explain about hydrogen electrode.	5	
b)	How will you perform analysis of mixture containing 3 metals Cu, Cd and Ca.	5	-
C)	Describe calomel electrode.

Second Sessional Theory Exam March 2023 DIV A

SUB: Pharmaceutical Inorganic Chemistry

Marks - 30

Time- 3pm to 04 pm (1 hr)

Date - 16/03/2023

Q. 01 Multiple Choice Questions (MCQ):		Marks
Povidone is chemically:		
A. Poly pyrrolidine		10
3. lodine + Potassium iodide	1	
C. Polyvinyl pyrrolidine		,
D. Iodine		1
. 10% w/v of Iodine and 6% w/v of Potassium Iod	lide in alcoholic solution is called as	Saltachia
) Strong Iodine Solution	The state of the second state of the second state of the second	Estate Inc.
) weak Iodine Solution		
) Iodine Tincture		
d) Aqueous Iodine Solution		
	The state of the s	3.1
3. Which one of the following drug is a saline catha	artic?	
A. Magnesium sulphate		
B. Magnesium trisilicate		
C. Magnesium carbonate		
D. Bismuth subcarbonate		
4. Which of the following radioisotopes has diagno	ostic application	
a) Phosphorus-32		
b) Chromium-51		
c) Cobalt-57		
d) All of Above		5310
5. Saline cathartic used in barium and lead poison	ing is:	
A. Copper sulphate		
B. Magnesium sulphate		
C. Ferrous sulphate		
D. Sodium sulphate		
6 Ammonium Chloride is useful in maintaining in	n acid base equilibrium of the body is also useful as,	ALL STATES
a) Expectorant.		
b) Antacid.		
c) Antioxidant.		
d) Protective.		100
		337
7. which of the following statement is correct for l	HCI?	
a) Help digestion of food		
b) kills harmful bacteria		
c) Absorbs Nutrients		
d) All of the above		
8. Which of the following is NOT an antacid?		
a) Caclium Carbonate		
b) Sodium Bicarbonate		
c) Kaolin		
d) Magnesium Oxide		183
u) magnesiam Oxide		

	20,537.0	
Whic	n of the following is not water soluble/non systemic antacid?	
Sodiu	m Bicarbonate	
)Calciu	ım Carbonate	
) Magn	esium Carbonate	
) Alun	inium Hydroxide Gel	
0) 1	eous Iodine Solution is also known as	
O) Aqu	inium Iodide	
) Alun	l's iodine	
West	(Iodine	
1) Iodii	e Tincture	
,		
	LD 196 mg and the last	
	10	
Q. 2 Lo	ng Questions (Answer ANY 01 out of 02)	
		197.9
	List the ideal properties of antacids, Discuss the method of preparation, assay, properties and uses of	10
1.	List the ideal properties of antacids, Discuss the method of properties of antacids of the method of properties of antacids of the method of properties of the method of the method of properties of the method of properties of the method of properties of the method of the metho	
	sodium bicarbonate and Aluminium Hydroxide Gel in detail.	
		er in the
	and the same production of the same productin	10
	What are saline cathartics, give classification and explain mechanism of action? Write in	10
2.	detail about Sodium orthophosphate, Bentonite and Kaolin.	
	detail about Sodium of the prospersy	1.5
	OR	0.00
2.	Explain in detail different mechanism of antimicrobial agent. Write method of	
	Explain in detail different mechanism of antifine total agents and Boric Acid. preparation, properties, assay and uses of Potassium Permanganate and Boric Acid.	
	10	
Q. 3 8	hort Questions (Answer ANY 02 out of 03)	
		5
1	Explain Iodine and Its preparation and Chlorinated Lime in detail.	3
1.		
		-
	The state and Emetics in Datail?	5
2.	What are expectorants and Emetics in Detail?	eense
		The state
		341.5
1	Wilder about	5
	Write about	1
3.	Process to be taken during handling of radiopharmaceutical and storage of	1
3.	Write about a) Precautions to be taken during handling of radiopharmaceutical and storage of Radioactive materials

	QUESTION PAPER PERIODIC TEST			
CLAS	SS :- First Year B. Pharm (B - Div)	SEM:- I		
	EME:- PCI Syllabus			
SUBJECT: - Pharmaceutical Inorganic Chemistry DATE: - 17/				
	ATION:- 60 mins	MARKS:-		00
Q.01	: MCQs		Marks	CO
a)	The outer layer of teeth is made up ofa) Calcium gluconate b) Calcium carbonate c) Calcium bicarbonate d) Calcium	chloride	1	
b)	The first edition of IP was published on a)1956 b) 1965 c) 1955 d) 1985		1	
c)	a)Sodium fluoride b) Calcium carbonate c) Zinc chloride d) Magnesium hydroxide		1	
d)	a)Sodium b) chloride c) bicarbonate d) Potassium		1	
e)	The standard for limit test for iron is made from		1	
f)	The barium chloride reagent contains. a) BaSO ₄ b) BaCl ₂ & K2SO ₄ c) Sulphate free alcohol d) All		1	
g)	Limit test for lead is also called as test. a) Hydrazine test b) Dithizone test c) Hydrazone test d) Semi carbazone test		1	
h)	90 percent of the cations in the extracellular fluids consist of: a) Hydroxyl ions b) Calcium ions c) Sodium ions d) Bicarbonate ions		1	
i)	Excessive amount of potassium in plasma is termed asa)Hypokalemia b) Hyperpotassaemia c) Hypocalcaemia d) Hypercholemia		1	
j)	The following is one of the source for Genotoxic impurities a)Catalyst b) By-products c) Intermediate products d) All		1	
Q.02	2 : Long answers (Any one)			
a)	Define Impurities. Discuss various sources of Impurities.		10	
b)	Define limit test. Explain reaction, principal, procedure for limit test of arsenic with diagram of Gutzeit apparatus or limit test for iron.		10	
Q.0	3 : Short Answers (Any two)			
a)	Give classification of dental product. What is dental decay? Write a note on anticari		5	
b)	Explain the importance of electrolytes. Write a short note on extracellular and intracellular electrolytes.		5	
c)	What is monograph? Describe the content of monograph with any one example.		5

	HEME:- PCI Syllabus			
-	BJECT:-Pharmaceutics-I	DATE:- 17		
Q.01	RATION:- 60 mins	MARKS:- 3		
a)	Which of the following are used as aid for handling of diagnostic equipm	. 111	Marks	CC
	Catheters and rectal thermometers? a. Medicated jellies b. Lubricating jellies c. Miscellaneous jellie jellies		1	
b) are semisolid preparations for external application that differ from similar products in containing a high proportion of finely powdered medicaments. a. Ointment b.Paste c. Gel d. Cream		1		
c)	Which base should be selected when water wash ability is the key require a.A hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base c. An emulsion base d. A water wash ability is the key required as a hydrocarbon base b.An absorption base b.An absorption base c. An emulsion base d. A water wash a hydrocarbon base b.An absorption b.An absorption base b.An absorption b.An absorption base b	ment? ter-soluble base	1	
d) Polyethylene glycol are also known as a. Oleaginous b. Macrogol c. Paraffin d. Lanolin			1	
e) Which base is likely to be the most occlusive on the skin? a.A hydrocarbon base b.An absorption base c. An emulsion base d. A water-soluble base		1		
f)	Following preparation need to be sipped and swallowed slowly a. Liniment b. Elixir C. Linctus d. Lotions		1	
g)	g) Following is monophasic liquid dosage form a. Emulsion b. suspension c. syrup d. cream			
h)	Cacking is problem in a. Emulsion b. lotions c, deflocculated suspension d. creams		1	
i)	Following are emulsifiers except a. Acacia b. methyl cellulose c. tween d. sucrose		1	
j)	Rheology of biphasic dosage form as a. Thixotropy b. Newtonian c. pseudoplastic d. plastic		1	
60	2: Long answers (Any one)			
a)	W Water whole off water solding pases lisely in thinimphi		10	
P.	b. What is a cream? Differentiate between water in oil and oil in water typ	e of cream.		
b)	write a note on emulsifiers		10	
	: Short Answers (Any two)			
a)	What is a gel? Write a note of different types of gel.		5	
b)	Classify semisolid dosage form. Give the advantages and disadvantages of dosage form.	f semisolid	5	
c)	Write a note on wetting phenomena in suspension		5
